

Danylo Bochkov

Full Stack Developer

Summary

I am a full-stack developer, looking for a full-time or part-time job position in a company that aims to help people feel comfortable using applications on the Internet. Development, practice, and work for results are essential to me. I have practical experience adhering to the Agile / Scrum methodology when working in a team. I am organized, and diligent, with a desire to learn new things.

Project Experience

1. Event Booster Application - an adaptive web application, designed to search events around the world. This was a team project. My role was Developer: I was responsible for the header and pagination sections. For the pagination section, I use pure JS, and for making an adaptive design for it.
2. Hellish English Landing Page - an adaptive website for an English school. This was a team project. My role was Developer: I was responsible for the review, teacher, and guarantee sections and for making an adaptive design for them.
3. WebStudio Landing Page - an adaptive website for a web studio. This was a solo project and my first project.
